# SAFETY DATA SHEET

French Polish

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

Product name

: French Polish

Product description Product type : Coating.

: Liquid.

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|   |                             | Identified uses |  |
|---|-----------------------------|-----------------|--|
| Industrial uses<br>Consumer uses<br>Professional uses |                             |                 |  |
|   | Uses advised against Reason |                 |  |
| None identified.                                      |                             | -               |  |

#### 1.3 Details of the supplier of the safety data sheet

Blackfriar Paints Ltd Portobello Industrial Estate Birtley County Durham United Kingdom DH3 2RE Telephone no.: +44 (0) 191 4106611 Fax no.: +44 (0) 191 4920125

e-mail address of person : rpmeurohas@ro-m.com responsible for this SDS

#### 1.4 Emergency telephone number

| <u>Supplier</u>    |                        |
|--------------------|------------------------|
| Telephone number   | : +44 (0) 207 858 1228 |
| Hours of operation | : 24/7                 |

# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 2, H225

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

# **SECTION 2: Hazards identification**

| Hazard pictograms   |  |
|---|--|
| Signal word   | : Danger   |
| Hazard statements   | : Highly flammable liquid and vapour.  |
| Precautionary statements  |  |
| General   | <ul> <li>P102 - Keep out of reach of children.</li> <li>P103 - Read label before use.</li> <li>P101 - If medical advice is needed, have product container or label at hand.</li> </ul> |
| Prevention  | : P210 - Keep away from heat, sparks, open flames and hot surfaces No smoking.   |
| Response  | <ul> <li>P370 - In case of fire:</li> <li>P378 - Use water spray, dry chemical powder or carbon dioxide for extinction.</li> </ul>   |
| Storage   | : P403 - Store in a well-ventilated place.<br>P235 - Keep cool.  |
| Disposal  | <ul> <li>P501 - Dispose of contents and container in accordance with all local, regional,<br/>national and international regulations.</li> </ul>                                       |
| Hazardous ingredients   | : Not applicable.  |
| Supplemental label elements   | : Not applicable.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.  |
| UFI Code  | : R5TA-JJP1-1NJG-FDTF  |
| Special packaging requiren  | <u>nents</u>   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.  |
| Tactile warning of danger   | : Yes, applicable.   |
| 2.3 Other hazards   |  |
| Other hazards which do  | : None known.  |

Other hazards which do : None known. not result in classification

# **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures               | : Mixture  |           |  |      |
|----------------------------|--|-----------|--|------|
| Product/ingredient<br>name | Identifiers  | %         | Classification<br>Regulation (EC) No. 1272/2008 [CLP]                | Туре |

# **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Туре

[1] Substance classified with a health or environmental hazard

- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern
- [6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| General                    | : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice. |
|----------------------------|---|
| Eye contact                | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
| Inhalation                 | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.      |
| Skin contact               | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.                            |

#### 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### Over-exposure signs/symptoms

| Eye contact  | : No specific data. |
|--------------|---------------------|
| Inhalation   | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion    | : No specific data. |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Date of issue/Date of revision | : 25/10/2018 | Date of previous issue | : 25/10/2018 | Version : 2 | 3/14 |
|--------------------------------|--------------|------------------------|--------------|-------------|------|
|                                |              |                        |              |             |      |

| SECTION 4: First aid measures |   |  |  |
|-------------------------------|---|--|--|
| Notes to physician            | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |  |  |
| Specific treatments           | : No specific treatment.  |  |  |

See toxicological information (Section 11)

Г

| SECTION 5: Firefighting measures                  |     |  |  |  |  |
|---|-----|--|--|--|--|
| 5.1 Extinguishing media                           |     |  |  |  |  |
| Suitable extinguishing media                      | -   | Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.   |  |  |  |
| Unsuitable extinguishing media                    | :   | Do not use water jet.  |  |  |  |
| 5.2 Special hazards arising f                     | ron | the substance or mixture   |  |  |  |
| Hazards from the substance or mixture             | :   | Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapour/gas is heavier than air and will spread along the ground. Vapours may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. |  |  |  |
| Hazardous thermal decomposition products          | :   | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide   |  |  |  |
| 5.3 Advice for firefighters                       |     |  |  |  |  |
| Special protective actions for fire-fighters      | :   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |  |  |  |
| Special protective<br>equipment for fire-fighters | :   | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.  |  |  |  |
| Additional information                            | :   | No unusual hazard if involved in a fire.   |  |  |  |

# **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|--|
| For emergency responders       | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |

#### 6.3 Methods and material for containment and cleaning up

| Date of issue/Date of revision :2 | 25/10/2018 | Date of previous issue | : 25/10/2018 | Version | :2 | 4/14 |
|-----------------------------------|------------|------------------------|--------------|---------|----|------|
|                                   |            |                        |              |         |    |      |

### **SECTION 6: Accidental release measures**

| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|---------------------------------|--|
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance.

| <ul> <li>7.1 Precautions for safe handling</li> <li>Prevent the creation of flammable or explosive concentrations of vapours in air ar avoid vapour concentrations higher than the occupational exposure limits. In addition, the product should only be used in areas from which all naked lights a other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard. Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. Operators should wear antistatic footwear and clothing and floors should be of the conducting type. Keep away from heat, sparks and flame. No sparking tools should be used. Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray mist arising from the application of this mixture. Avoid inhalation of dust from sanding. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Put on appropriate personal protective equipment (see Section 8). Never use pressure to empty. Container is not a pressure vessel. Always keep in containers made from the same material as the original one. Comply with the health and safety at work laws. Do not allow to enter drains or watercourses. Information on fire and explosion protection Vapours may form explosive mixtures with air.</li> </ul> | and<br>9<br>e<br>or |
|---|---------------------|
|---|---------------------|

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

#### Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

#### Danger criteria

### **SECTION 7: Handling and storage**

|     | Notification and MAPP threshold | Safety report threshold |
|-----|---------------------------------|-------------------------|
| P5c | 5000                            | 50000                   |

#### 7.3 Specific end use(s)

- Recommendations
- : Not available.

Industrial sector specific solutions

: Not available.

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### Occupational exposure limits

| Product/ingredient name                  |   | Exposure limit values  |
|--|---|--|
| ethanol                                  |   | EH40/2005 WELs (United Kingdom (UK), 12/2011).<br>TWA: 1920 mg/m <sup>3</sup> 8 hours.<br>TWA: 1000 ppm 8 hours.   |
| Recommended monitoring :<br>procedures   | atmosphere or h<br>of the ventilation<br>protective equip<br>the following: E<br>the assessment<br>limit values and<br>atmospheres - (<br>of exposure to c<br>(Workplace atm<br>for the measure | ontains ingredients with exposure limits, personal, workplace<br>biological monitoring may be required to determine the effectiveness<br>on or other control measures and/or the necessity to use respiratory<br>ment. Reference should be made to monitoring standards, such as<br>suropean Standard EN 689 (Workplace atmospheres - Guidance for<br>to of exposure by inhalation to chemical agents for comparison with<br>measurement strategy) European Standard EN 14042 (Workplace<br>Guide for the application and use of procedures for the assessment<br>chemical and biological agents) European Standard EN 482<br>nospheres - General requirements for the performance of procedures<br>ement of chemical agents) Reference to national guidance<br>methods for the determination of hazardous substances will also be |
| DNELs/DMELs<br>No DNELs/DMELs available. |   |  |
| PNECs<br>No PNECs available              |   |  |
| 8.2 Exposure controls                    |   | to vontilation. Where reasonably practicable, this should be   |

| Appropriate engineering controls | : Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn. |
|----------------------------------|--|
| Individual protection measur     |  |

Hygiene measures
 Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

6/14

### **SECTION 8: Exposure controls/personal protection**

| Eye/face protection | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with |
|---------------------|---|
|                     | side-shields.   |
|                     |   |

#### **Skin protection**

#### Hand protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.

The breakthrough time must be greater than the end use time of the product.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

Always ensure that gloves are free from defects and that they are stored and used correctly.

The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.

Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

| Gloves                          | : | For prolonged or repeated handling, use the following type of gloves:   |
|---------------------------------|---|---|
|                                 |   | Recommended: > 8 hours (breakthrough time): gloves : nitrile rubber (0.5mm)<br>The recommendation for the type or types of glove to use when handling this<br>product is based on information from the following source:<br>EN 374  |
|                                 |   | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.   |
| Body protection                 | - | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods. Recommended: Wear overalls or long sleeved<br>shirt. (EN 1149-1) |
| Other skin protection           | : | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | : | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: organic vapour filter (Type A) (EN 140)   |
| Environmental exposure controls | : | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

# **SECTION 9: Physical and chemical properties**

| 9.1 Information on basic phy   | vsical and chemical properties      |              |             |      |
|--------------------------------|-------------------------------------|--------------|-------------|------|
| <u>Appearance</u>              |                                     |              |             |      |
| Physical state                 | : Liquid.                           |              |             |      |
| Colour                         | : Brown. [Light]                    |              |             |      |
| Odour                          | : Alcohol-like.                     |              |             |      |
| Odour threshold                | : Not available.                    |              |             |      |
| рН                             | : Not available.                    |              |             |      |

# SECTION 9: Physical and chemical properties

| Melting point/freezing point                    | : Not available.  |
|---|---|
| Initial boiling point and boiling range         | : Not available.  |
| Flash point                                     | : Closed cup: 12°C  |
| Evaporation rate                                | : Not available.  |
| Flammability (solid, gas)                       | : Flammable in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and shocks and mechanical impacts.     |
| Upper/lower flammability or<br>explosive limits | : Lower: 3,5%<br>Upper: 19%   |
| Vapour pressure                                 | : Not available.  |
| Vapour density                                  | : >1 [Air = 1]  |
| Relative density                                | : 0,87 to 0,88  |
| Solubility(ies)                                 | : Soluble in the following materials: methanol.   |
| Partition coefficient: n-octanol/<br>water      | : Not available.  |
| Auto-ignition temperature                       | : Not available.  |
| Decomposition temperature                       | : Not available.  |
| Viscosity                                       | : Dynamic (room temperature): 30 mPa·s<br>Kinematic (room temperature): 0,34 cm <sup>2</sup> /s   |
| Explosive properties                            | : Non-explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and shocks and mechanical impacts. |
| Oxidising properties                            | : Not available.  |

#### 9.2 Other information

No additional information.

| <b>SECTION 10: Stabilit</b>              | / and reactivity  |    |
|--|---|----|
| 10.1 Reactivity                          | : No specific test data related to reactivity available for this product or its ingredients   | s. |
| 10.2 Chemical stability                  | : Stable under recommended storage and handling conditions (see Section 7).   |    |
| 10.3 Possibility of hazardous reactions  | : Under normal conditions of storage and use, hazardous reactions will not occur.   |    |
| 10.4 Conditions to avoid                 | : When exposed to high temperatures may produce hazardous decomposition products.   |    |
| 10.5 Incompatible materials              | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.  |    |
| 10.6 Hazardous<br>decomposition products | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. If involved in a fire, toxic gases including CO, CO2 and smoke can be generated. |    |

# **SECTION 11: Toxicological information**

### 11.1 Information on toxicological effects

| Acute toxicity<br>Conclusion/Summary<br>Acute toxicity estimates<br>Not available. | :            | Based on available data, the classification criteria are not met. |
|--|--------------|---|
| Irritation/Corrosion   |              |   |
| <b>Conclusion/Summary</b>  |              |   |
| Skin   | :            | Based on available data, the classification criteria are not met. |
| Eyes   | :            | Based on available data, the classification criteria are not met. |
| Respiratory  | :            | Based on available data, the classification criteria are not met. |
| Sensitisation  |              |   |
| <b>Conclusion/Summary</b>  |              |   |
| Skin   | :            | Based on available data, the classification criteria are not met. |
| Respiratory  | 1            | Based on available data, the classification criteria are not met. |

|---|--------------------------|--------------|-------------|-------|

# **SECTION 13: Disposal considerations**

The European Waste Catalogue classification of this product, when disposed of as waste, is:

| Waste code              | Waste designation   |  |  |
|-------------------------|---|--|--|
| 08 01 11*               | waste paint and varnish containing organic solvents or other hazardous substances   |  |  |
| Packaging               |   |  |  |
| Methods of disposal     | <ul> <li>The generation of waste should be avoided or minimised wherever possible. Waste<br/>packaging should be recycled. Incineration or landfill should only be considered<br/>when recycling is not feasible.</li> </ul>  |  |  |
| Disposal considerations | <ul> <li>Using information provided in this safety data sheet, advice should be obtained from<br/>the relevant waste authority on the classification of empty containers.<br/>Empty containers must be scrapped or reconditioned.<br/>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions.</li> </ul>   |  |  |
| Special precautions     | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |  |  |

### **SECTION 14: Transport information**

```
14.6 Special precautions for user
```

for : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

# **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH) Annex XIV - List of substances subject to authorisation **Annex XIV** None of the components are listed. Substances of very high concern None of the components are listed. Annex XVII - Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles Other EU regulations VOC : The provisions of Directive 2004/42/EC on VOC apply to this product. Refer to the product label and/or technical data sheet for further information. **VOC for Ready-for-Use** : IIA/f. Interior and exterior minimal build woodstains. EU limit value for this product : **Mixture** 700g/l (2010.) This product contains a maximum of 700 g/l VOC. **Europe inventory** : All components are listed or exempted. Ozone depleting substances (1005/2009/EU) Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

#### Seveso Directive

This product is controlled under the Seveso Directive.

#### Notice to reader

The information in this Safety Data Sheet is based on the present state of knowledge and current legislation. It provides guidance on health, safety and environmental aspects of the product and should not be construed as any guarantee of technical performance or suitability for particular applications. The product should not be used for purposes other than those shown in Section 1 without first referring to the supplier and obtaining written handling instructions. As the specific conditions of use of the product are outside the supplier's control, the user is responsible for ensuring that the requirements of relevant legislation are complied with. The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation.
