MIRKA Dustless Sanding

Look after your health and your wealth with our dustless sanding packages. Prepare surfaces faster and cleaner with Mirka.

Mirka® DEROS & DEOS Dynamic Duo Kit

PMIR28110

£649.00

Since 1997, there is a new division of hazardous dusts and their assigned vacuum machines. These are regulated by IEC 60335-2-69 (worldwide) and by EN 60335-2-69 (European wide). Advantages of automatic filter cleaning

- Less maintenance
- Constant performance
- Possibility to work without dust bags

Dust Class L (light). The dusts which belong to this class are dusts with OEL values > 1 mg/m3. The machine is tested in its entirety by vacuums for this dust class. The maximum degree of permeability is 1%. Dust Class M (medium). The dust which belongs to this class are: dusts with OEL values > 0.1 mg/m3 as well as saw dust. The machine is tested in its entirety by vacuums for this dust class. The maximum degree of permeability is 0.1% and the disposal must be of low dust consumption.
